

(a) Priority bands

Band 1 audiovisual work
Band 2 documentary film
Band 3 film
Band 4 movie
Band 5 war film,
action film,
biographical film

ranked by Weeds-precision in-degree,
high $\rightarrow$ low (τ , band tolerance δ).

documentary film outranks film here --
in-degree is a frequency proxy, not true
generality (realistic mis-tiering risk).

(b) Step 1 -- audiovisual work

audiovisual work

pool empty $\rightarrow$ no candidates
 $\rightarrow$ **none** $\rightarrow$ becomes a root

(c) Step 2 -- documentary film

audiovisual work
 $\hookrightarrow$ documentary film

vs {audiovisual work}: child of
 $\rightarrow$ descend; vs {}: **none** $\rightarrow$ settle

too shallow -- film doesn't
exist yet (corrected next)

(d) Step 3 -- film

the retroactive-correction step

audiovisual work
 $\hookrightarrow$ ~~documentary film~~

parent of $\downarrow$ reparent

audiovisual work
 $\hookrightarrow$ **film**
 $\hookrightarrow$ documentary film

vs {audiovisual work}: child of
 $\rightarrow$ descend; vs {documentary film}:
parent of $\rightarrow$ retroactive insertion

a later, more specific node corrects
an earlier too-shallow attachment.

(e) Step 4 -- movie

audiovisual work
 $\hookrightarrow$ film **@movie**
 $\hookrightarrow$ documentary film

vs {audiovisual work}: child of
 $\rightarrow$ descend; vs {film}:
synonym $\rightarrow$ merge

"movie" folds in as a surface
form -- no new node created.

(f) Step 5 -- war film

audiovisual work
 $\hookrightarrow$ film @movie
 $\quad \vdash$ documentary film
 $\quad \hookrightarrow$ war film

child of $\rightarrow$ descend ($\times 2$);
vs {documentary film}: **none**
 $\rightarrow$ settle as child of film

(g) Step 6 -- action film

a new shared parent is synthesized

audiovisual work
 $\hookrightarrow$ film
 $\quad \vdash$ documentary film
 $\quad \hookrightarrow$ **genre film**
 $\quad \quad \vdash$ war film
 $\quad \quad \hookrightarrow$ **action film**

vs {documentary film, war film}:
same class w/ war film $\rightarrow$ synthesize
war film's edge moves film $\rightarrow$ genre film

(h) Step 7 -- biographical film

final tree after all seven steps

audiovisual work
 $\hookrightarrow$ film @movie
 $\quad \vdash$ documentary film
 $\quad \quad \hookrightarrow$ **biographical film**
 $\quad \hookrightarrow$ genre film
 $\quad \quad \vdash$ war film
 $\quad \quad \hookrightarrow$ action film

vs {documentary film, genre film}:
child of doc. film $\rightarrow$ descend;
vs {}: **none** $\rightarrow$ settle

Outcome that produced each highlighted node/edge:

 none (settle)

 synonym (merge)

 parent of (retroactive insertion)

 same class (synthesize shared parent)

"child of" -- see decision traces above
