

(a) Priority bands

- 1. audiovisual work
- 2. documentary film
- 3. film
- 4. movie
- 5. war film, action film, biographical film

ranked by Weeds-precision in-degree: high → low
(τ , band tolerance δ).

documentary film outranks film here --
in-degree is a frequency proxy, not true
generality (realistic mis-tiering risk).

(b) Step 1 -- audiovisual work

audiovisual work

pool of roots empty → **no candidates**
audiovisual work → **becomes a root**

(c) Step 2 -- documentary film

audiovisual work
↳ **documentary film**

documentary film vs {audiovisual work}: **child of**
→ **descend**; documentary film vs none → **settle**

too shallow -- film doesn't
exist yet (corrected next)

(d) Step 3 -- film

the retroactive-correction step

audiovisual work
↳ ~~documentary film~~

parent of → reparent

↳ **film**
↳ documentary film

film vs {audiovisual work}: **child of**
→ **descend**; film vs {documentary film}:
parent of → retroactive insertion

a later, more specific node corrects
an earlier too-shallow attachment.

(e) Step 4 -- movie

audiovisual work
↳ film ⊕ **movie**
↳ documentary film

movie vs {audiovisual work}: **child of**
→ **descend**; movie vs {film}: **merge**

"movie" folds in as a surface
form -- no new node created

(f) Step 5 -- war film

audiovisual work
↳ film ⊕ movie
↳ documentary film
↳ war film

child of → descend (x2);
war film vs {documentary film}: **none**
→ **settle as child of film**

(g) Step 6 -- action film

a new shared parent is synthesized

audiovisual work
↳ film
↳ documentary film
↳ **genre film**
↳ war film
↳ **action film**

child of → descend (x2);
action film vs {documentary film, war film}:
same class w/ war film → **synthesize**
war film's **edge moves** film → genre film

(h) Step 7 -- biographical film

final tree after all seven steps

audiovisual work
↳ film ⊕ movie
↳ documentary film
↳ **biographical film**
↳ genre film
↳ war film
↳ action film

biographical film vs {documentary film, genre film}:
child of documentary film → **descend**;
biographical film vs {}: **none** → settle
